

TRAILS Evolve your bike skills.

- EASIEST** Gentle climbs and descents perfect for beginner mountain bikers or as a warm up to the day. Enjoy gradual grades and fun rollers; rocks, gravel, roots and bridges may be encountered.
- INTERMEDIATE** More challenging terrain featuring steeper slopes and narrow single-track with natural and man-made obstacles. Previous mountain biking experience highly recommended.
- ADVANCED** These trails have a mixture of long steep climbs and descents, loose trail surface, numerous man-made obstacles including jumps, ramps, elevated features, berms, drops, rocks and other terrain variations.
- EXPERT** Without exception, expert mountain bikers with extensive downhill mountain biking experience should be the only riders on this trail. Features encountered will be steeper, larger, more difficult and of higher consequence than advanced level trails.

**MULTI-USE TRAILS** Multi-use trails are accessible for uphill and downhill travel to bikers and hikers; please make your presence known well in advance when approaching other users. Downhill riders must yield to uphill traffic.
